About Us :

Techno Industrial Solutions is a leading provider of industrial automation solutions, specializing in the manufacture of PLC control panels and SPM machine control panels. We offer a comprehensive range of services, including control panel design, schematics drawing, and wiring, all tailored to meet the specific needs of our industrial clients.

Our team is committed to delivering high-quality, customized solutions with a focus on safety, workmanship, and customer satisfaction. We stay ahead of industry trends and advancements in control panel wiring, electrical maintenance, and automation technologies, ensuring that our solutions are both innovative and sustainable. With a dedication to reliability and cost-effectiveness, we maintain open communication with clients, fostering strong, long-term partnerships based on trust and dependable service delivery.

Why Choose Us?

Affordable Price

Our Affordable Electric Services,
You Can Have Peace Of Mind.

Free Estimation

We provide free estimates
for our electrical services.

24/7 availability

Our 24/7 Electric Service, You Can
Trust That We Will Be Support You.

◆ PLC Control Panel

We specialize in providing high-performance PLC (Programmable Logic Controller) Control Panels designed to meet the automation and control needs of various industries. Our panels are engineered to ensure seamless operation, precision control, and enhanced productivity.

Custom Design Solutions : Tailored to suit specific industrial processes and machinery requirements.

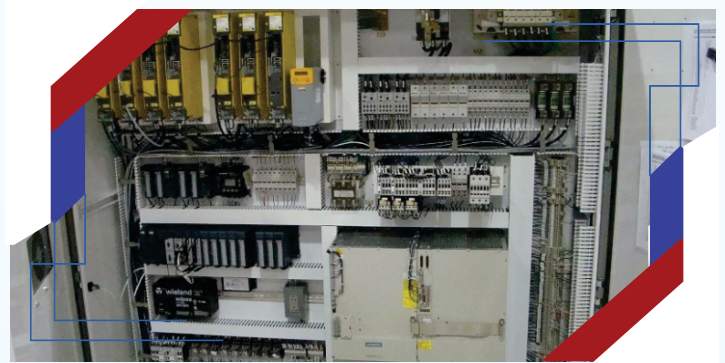

Efficient Automation : Streamlines operations with precise control over machinery and processes.

High-Quality Components : Panels built using top-grade PLCs and electrical components for reliability and durability.

Easy Integration : Compatible with existing systems and ready for future upgrades.

◆ Retrofit of CNC Machines

We provide all types of CNC Machine Control Panel Redesigning, Programming Our certified Engineers and Technician are experienced and skilled in all types of Retrofit of CNC Machines

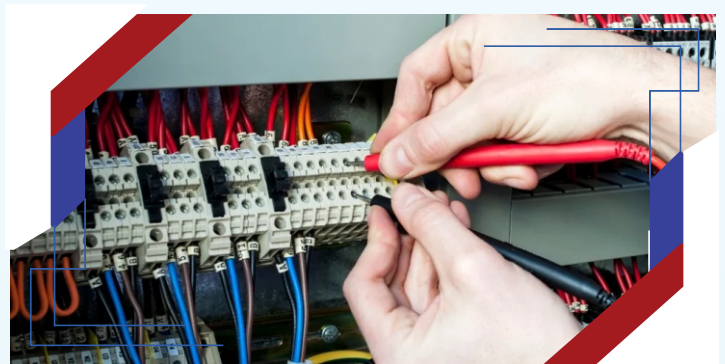

◆ Equipment Maintenance Services

We provide regular maintenance services, Annual maintenance contract (AMC) for all types of industrial Electrical equipment, including conveyor systems, MCC Control panels, PLC Control Panel, Welding Machine's and many more. Our services ensure that your equipment is operating efficiently and safely.

◆ Breakdown Services / Emergency Repair Service

We offer Industrial Equipment and emergency repair services for unexpected breakdowns and malfunctions. Our team of experts will respond quickly to get your equipment back up and running as soon as possible

◆ Solar Services

Solar services encompass a wide range of offerings related to the design, installation, maintenance, and optimization of solar energy systems. These services cater to residential, commercial, and industrial clients looking to harness solar power for electricity generation, water heating, or other applications.

◆ Installation and Commissioning Services

We specialize in the installation and commissioning of all types of electrical machines and equipment, ensuring seamless integration and optimal performance. Our experienced team is equipped to handle a wide range of industrial requirements with precision and efficiency.

◆ Consulting Services

We offer consulting services for industrial equipment and machinery, including equipment selection, Control Panel layout design, Electrical Schematics, General arrangement drawing (GA drawing), Product CAD Draw and process optimization.

Our team of experts will work with you to find the best solution for your needs.

◆ Man Power Services

- Contract Staffing
- Payroll Outsourcing and Management
- Housekeeping Manpower Services
- Employee Engagement
- Production Line
- Recruitment Process Outsourcing
- Permanent Recruitment.

◆ PLC, HMI, SCADA Programming Services

We offer comprehensive programming and testing services for PLC, HMI, and SCADA systems, ensuring seamless automation and control for industrial operations. Our expertise caters to a wide range of industries, delivering customized solutions for diverse applications.

PLC Programming :

Development, testing, and optimization of programs for all major PLC brands to automate processes efficiently.

HMI Design and Programming :

User-friendly interfaces designed to simplify system monitoring and control.

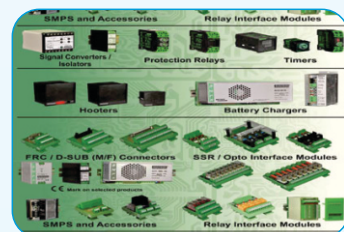

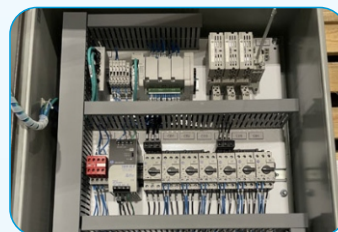

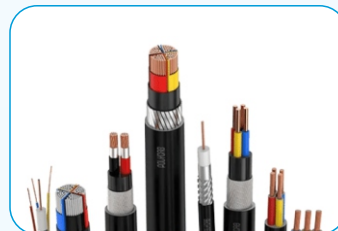

SCADA Integration :

Implementation of robust SCADA systems for real-time data acquisition and remote monitoring.

System Testing and Troubleshooting :

Rigorous testing and debugging to ensure optimal system performance and reliability.
